-

Experience

Coruscate Ventures (Tallywiz)

Sr. React.JS Developer • Surat, Gujarat

02/2022 – 05/2022

As a Product Team member of suvit.io, We provide solutions for Accountants (CAs) integrated with Tally.

- Providing the best user experience is my job. I handle the frontend side of the product. We use React technology.

Artoon Solutions (Ultimate Business System pvt. Ltd.)

Sr. React Js Developer • Surat, Gujarat
Ultimate Business System Private Ltd.

01/2020 – 02/2022

I was working with React Js and JavaScript to develop the product "Ultimate Business System"

We have a team of 35 members, of which I lead the front-end team of 10 members, I've also worked on the HRMS and Payroll module of the UBS App.

Working with React Js and JavaScript technology, I completed the following client base projects:

- [Suponic Exchange](#):
Based on crypto coin, team of three member (React Js)
Role: Work with the client for requirements, implement the frontend, and submit it.
- [Suponic Game](#):
Based on crypto coin game, team of two member (React Js)
Role: Obtain client requirements, implement the frontend, and submit the project.
- [Baseball Cloud](#):
Based on sports events, team of ten member (React Js)
Role: I managed the CMS component of the project. The project manager and I worked together on the requirements, and I communicated with the designers, back-end developers, and QA team to ensure everything was in order, before submitting the project.

- [Sundance Film Festival 2020](#):
OTT festival platform, team of thirty member (React Js)
Role: In this project, I was responsible for the CMS and private screening. During my role, I was responsible for overseeing progress related to the CMS and providing assistance when necessary. and also developed the private screening features with realtime chat. R&D for new features.
- [Goodpix](#):
Based on E-commerce, team of eleven member (JS, FabricJs, ReactJs)
Role: Communicate with the client and fullstack team, developed Admin panel and Parterpanel. Research and development for new feature.

Jr. Web Developer

Sourcenet IT Service Provider Private Ltd. • Surat, Gujarat

06/2018 – 01/2020

As follows were my client base projects using .Net technology with MySQL as the backend and React Js as the front-end.

- [Mysail](#):
Based on sailing sports events, team of three member (ReactJS).
Role: My job was to handle the front end and provide support for any changes made during runtime.
- [Unistel](#):
Based on genetics research and development for Human and Animal, team of four member (.Net with ReactJs, MySQL).
Role: I was fullstack developer, I was handle both side of the projects equally. The database is very big, and I need to migrate it from the old system to the new one. The database is connected to the machine of laboratories, so it's also challenging.
- [Patients Studio](#):
Based medicals and hospitals, team of four member (.Net with ReactJs, MySQL)
Role: I worked as a full-stack developer. My work was equally distributed between the front-end and back-end of the project.
- My Design Studio:
Based on graphics printing on objects, team of two member (JS, FabricJs, JQuery).
Role: Previously, I worked as a Javascript developer. I am responsible for making sure things are done in accordance with client requirements
